Hi [Ex. 6 Personal Privacy (PP)]

Thanks for sending me these comments and letting me know that Gov. Dugaard has declared a state of emergency for ranchers and farmers because of drought. Your comment prompts me to keep track of the Governor's website for announcements like this from now on.

Please feel free to send me info like this even after the public comment period is over, if you have time, to make sure I don't miss info like this.

Thanks!
Valois

Subject: Comment against the proposed Dewey - Burdock UIC Project

We are now entering another of many severe periods of severe drought in South Dakota; Governor Dugaard just declared a emergency measure for ranchers and farmers.

It seems that issuing a permit to use precious waster recourses for a project like ISL uranium mining is most irresponsible, considering that the use and construction of nuclear power plants is in decline as we speak.

Uranium energy is in decline!

The Inyan Kara water is usable if need be, with filtering, and so is the water in the Minnesula Aquafur

We cannot afford to squander this precious resource on a venture that surely will have irreversible negative devastating results for a large Area and population. Not mentioning the overall health of the environment.
